RE: Digi International
Response to 4-9-07 Comments

FCC ID: MCQ50M1355

1. ATCB Comments: The MPE calculations are missing for category mobile. Please upload RF Exposure exhibit using the formula supplied by the FCC. The distance must be 20 cm. The FCC will not accept anything but 20 cm. The equations would be:

RESPONSE: Revised RF exposure letter uploaded.

2. ATCB Comments: Please place RF Exposure Statement in the users manual.

RESPONSE: See page 94 of revised manual that has been uploaded.

3. ATCB Comments: The IC label must have the IC identifier and the manufacturer name and the model number. Please revise label to include this.

RESPONSE: The IC identifier silkscreen on the board (IC: 1846A-50M1355) and the Digi logo, p/n and model name on a separate label. Is this not acceptable?

4. ATCB Comments: The answer to Question 8 of the Modular Approval Letter does not pertain to Industry Canada. This is an FCC requirement only. Please revise your answer per question 1 and 2 of this comment letter to answer Question 8 of the Modular Approval Letter. Again all 15.247 applications require MPE calculations to 20 cm for category mobile. No exceptions unless a waiver in writing is permitted by the FCC. Please revise modular approval letter and upload to ATCB.

RESPONSE: Revised Modular Approval Questionnaire uploaded.

Please let us know if anything further is required.
