Tim:

I am really very sorry about all this back-and-forth with this application - I wasn't privy to your discussion with Desmond yesterday. I just uploaded a revised letter from the client that I hope will meet the requirements. Please advise if it does not.

Thank you very much.

Kathy,

I am a little confused about the response to the last question in our latest correspondence. Talking with Desmond today, the approval will only be valid for the following system: DC Injector, 1 Watt Amplifier, Access Point with integrated PCMCIA Card.

The other models (PCMCIA Card by itself and the bridge models) will not be covered by this application. However, the last Client attestation uploaded references the access point, PCMCIA Card, and 2 bridge models. This contradicts my understanding of what we discussed. Please explain.

Thanks,

Tim
