Compatible Electronics TCB  
114 Olinda Drive  
Brea, California 92823

Gentlemen:

This is a letter is to declare that we **Universal Electronics**, granted permission by the authorities, intend to make the following changes in our implementation of the IR/RF Remote Control with respect to the scope of its original certification:

**FCC ID: MG3-2024**

**List of changes:**

1. Y2 (32.768kHz), C27, and C28 are not populated on the PCBA as the uC now supports an internal RTC signal. The only change for the uC part number is the revision of the TI CC2620 IC from a PG2.2 revision to PG2.3. As a result, the 32KHz crystal and its associated loading caps can be removed. The product model number changed from URC-2024BC0-R to URC-2024BC1-R

If you have any questions or need additional information, please contact the undersigned at **(714) 918-9701**

Regards,

A handwritten signature in black ink, appearing to read "Jesse Mendez". The signature is fluid and cursive, with a large loop at the end.

**Jesse Mendez**  
**Staff Engineer Electrical**
