RE: FCC Labelling Requirements  
FCC ID: MG3-YD001

Hopping Algorithm: All channels are 1 MHz apart and hop through the channels using a pseudo-random hopping sequence. The device hops from channel to channel at a rate of 1600 hops per second. The radio is completely controlled by the associated software stack and application program. The stack controls the hopping sequence, and protocols for establishing a connection with other Bluetooth devices in the near vicinity.

Thank you for your attention to this matter.

Yours faithfully  
*Universal electronics*

A handwritten signature in blue ink, appearing to read 'Jesse Mendez', with a long horizontal flourish extending to the right.
