## ADVANCED REMOTE SETTINGS

In addition to setting up your DIRECTV Remote to control your TV and other devices the following Advanced Settings are available: IR/RF Setup, Volume Lock, Set Receiver Mode and Multi-Box Setup.

### IR/RF Setup

Remote Control models RC65R, RC65RB, RC65RX, and RC65RBRX feature RF (radio frequency) capability. When you activate the RF feature of your remote control, you can control your DIRECTV Receiver from anywhere in your home. You do not need to be in the line of sight of your receiver to control it.

**NOTE:** Not all DIRECTV Receivers are RF-capable.

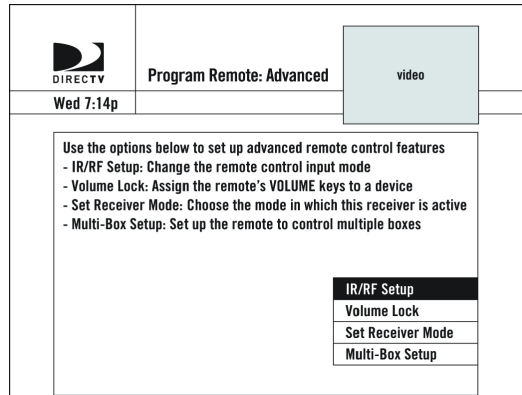

To activate the RF transmitter on your DIRECTV Remote:

1. Turn on your TV and DIRECTV Receiver.
2. Slide the **MODE** switch to the DIRECTV position.

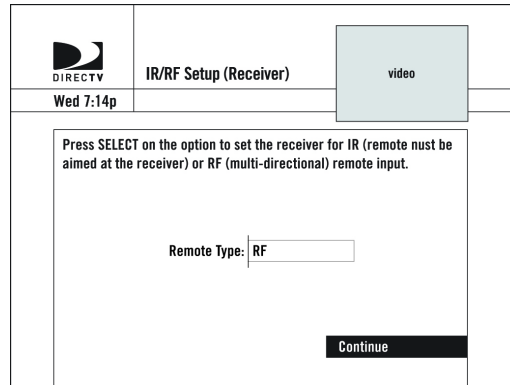

3. Press **MENU** on your remote control, then select “Parental, Fav’s & Setup,” “System Setup,” and “Remote Control.”
4. Select “Program Remote.”

6. Select **“IR/RF Setup.”**

7. Change remote type from **“IR”** to **“RF”** and select **“Continue.”**

8. Follow the on-screen instructions to complete the process.

### Volume Lock

If you've programmed your DIRECTV remote to control your TV, this "locks" the **VOL +/-** and **MUTE** control to your TV. In other words, any time you press the **VOL +/-** or **MUTE** keys on your remote, it will adjust the volume through your TV, regardless of the position of the **MODE** switch.

If you want the audio for your DIRECTV programs to come through a component other than your TV (Ex. Stereo), you can "lock" volume control to that device as follows:

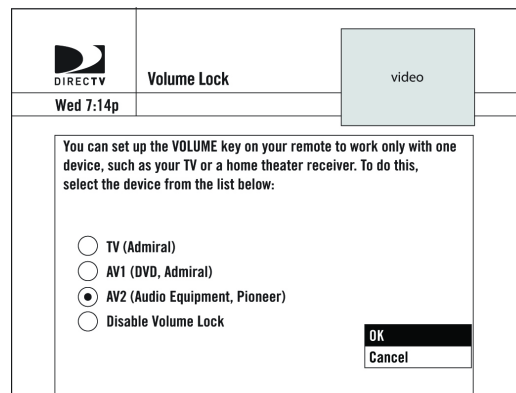

1. Turn on your TV, DIRECTV Receiver and other component (Ex. Stereo).

**TIP:** If you have not already done so, first program your remote to control your TV and then program your remote to control your other components, Ex. Stereo. See instructions on pages 8 and 10, respectively.

2. Slide the **MODE** switch to the DIRECTV position.

3. Press **MENU** on your remote control, then select "Parental, Fav's & Setup," "System Setup," and "Remote Control."
4. Select "Program Remote."
5. Select "Advanced."
6. Select "Volume Lock."
7. Select the device you want to control audio (Ex. Stereo that you've already programmed to AV2) and select "OK."

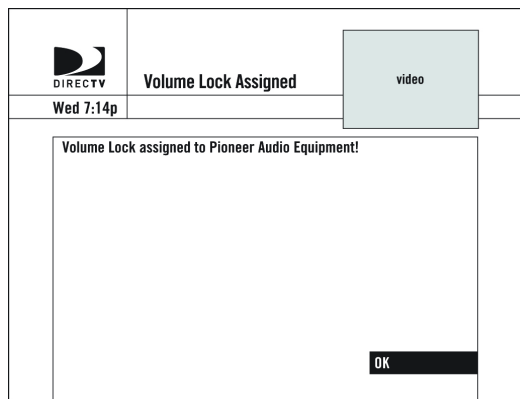

8. Follow the on-screen instructions to complete the process.

**TIP:** Don't forget to keep your remote pointed at the DIRECTV Receiver! Your remote is receiving information from the DIRECTV Receiver.

9. If Volume Lock was successful, the following message will display. If not, you will be given the options to "Try Again" or "Cancel."

5. Using the **NUMBER** keys, enter the 5-digit code for the brand of component being set up. If performed correctly, the green light under the selected position flashes twice.
6. Aim the remote at your component and press the **PWR** key once. The component should turn off; if it does not, repeat steps 3 and 4, trying each code for your brand until you find the correct code.
7. Repeat steps 1 through 6 to set up a new component under **AV2** (or **AV1**).

8. For future reference write down the working code for the component(s) set up under **AV1** and **AV2** below:

COMPONENT TYPE	COMPONENT ID #
Satellite	0
TV	1
VCR/DVD/PVR	2
Stereo	3

5. Press **PWR**, or other functions (e.g. **PLAY** for VCR) you want to use.
6. Point the remote at the TV or component and press **CHAN▲**. Repeatedly press **CHAN▲** until the TV or component turns off or performs the action you selected in step 5.

**NOTE:** Every time **CHAN▲** is pressed the remote advances to the next code and power is transmitted to the component.

7. Use the **CHAN▼** key to step back a code.

8. When the TV or component turns off or performs the action you selected in step 5, stop pressing the **CHAN▲** key. Then, press and release the **SELECT** key.

**NOTE:** If the light flashes 3 times before the TV or component responds, you've cycled through all codes and the code you need is not available. You must use the remote that came with your TV or component.

### Verifying the Codes

Once you have set up the DIRECTV® Universal Remote Control using the above steps, use the following instructions to find out the 5-digit code to which your component responded:

1. Slide the **MODE** switch to the appropriate position.
2. Press and hold the **MUTE** and **SELECT** keys at the same time until the green light under the selected switch position flashes twice, then release both keys.
3. Enter **9-9-0**. (The green light under the selected switch position flashes twice.)
4. To view the first digit in the code, Press and release the number **1** key. Wait three seconds, and count the number of times the green light flashes. Write this number down in the leftmost TV, AV1 or AV2 code box found on page 19.
5. Repeat step 4 four more times for the remaining digits; i.e., press number **2** for the second digit, **3** for the third digit, **4** for the fourth digit and **5** for the final digit.

### CHANGING VOLUME LOCK

Depending on how you set up your remote, the **VOL** and **MUTE** may control the volume only on your TV, regardless of the position of the **MODE** switch. This remote can be set up so that the **VOL** and **MUTE** keys work *only* with the component selected by the **MODE** switch. To enable this feature, perform the following steps:

1. Press and hold the **MUTE** and **SELECT** keys until the green light under the **DIRECTV** position flashes twice, then release both keys.
2. Using the number keys, enter **9-9-3**. (The green light will flash twice after the **3**.)
3. Press and release the **VOL+** key. (The green light flashes 4 times.)

Now the **VOL** and **MUTE** keys will work *only* for the component selected by the **MODE** switch position.

### Locking Volume to AV1, AV2 or TV

1. Slide the **MODE** switch to the **AV1**, **AV2** or **TV** position to lock the volume.
2. Press and hold the **MUTE** and **SELECT** keys until the green light under the selected switch flashes twice and release both keys.
3. Using the number keys, enter **9-9-3**. (The green light flashes twice.)

4. Press and release the **SELECT** key. (The green light flashes twice.)

**NOTE:** DIRECTV® Receivers don't have volume control, so the remote will not allow the user to lock volume to the DIRECTV mode.

## ACTIVATING AND DEACTIVATING THE RF TRANSMITTER

Your DIRECTV Remote Control features RF (radio frequency) capability. When you activate the RF feature of your remote control, you can control your DIRECTV Receiver from anywhere in your home. You do not need to be within the line of sight of your receiver to control it.

**NOTE:** Not all DIRECTV Receivers are RF-capable. Also, some RF-capable DIRECTV Receivers include integrated RF antennas and do not require an external antenna. If your receiver requires the external RF antenna, before activating the RF transmitter, locate the RF antenna included with your remote control and insert it into the RF remote antenna coaxial connector on the back of your DIRECTV Receiver.

### Activating the RF Transmitter

To activate the RF transmitter on your DIRECTV Remote Control, perform the following steps:

1. Locate the 12 digit Receiver ID (RID) number of your DIRECTV Receiver. You can find the RID number on the back panel of your receiver, or inside the CAM access door next to the reset button.
2. Write down the last six digits of the RID number.
3. Slide the mode switch to **DIRECTV, AV1**, or **AV2**.
4. Press and hold the **MUTE** and **SELECT** keys until the green light under the selected switch flashes twice and release both keys.
5. Using the number keys, enter **9 6 1**. (The green light flashes twice.)
6. Press and release **CHAN▲**. (The green light flashes twice.)
7. Using the **NUMBER** keys, enter the last six digits of the RID number. (See step 2 above.)
8. Press and release the **SELECT** key. (The green light flashes twice.)

### Deactivating the RF Transmitter

To deactivate the RF transmitter on your DIRECTV Remote Control, perform the following steps:

1. Slide the mode switch to **DIRECTV, AV1**, or **AV2**.
2. Press and hold the **MUTE** and **SELECT** keys until the green light under the selected switch flashes twice and release both keys.
3. Using the number keys, enter **9 6 1**. (The green light flashes twice.)
4. Press and release **CHAN▼**. (The green light flashes twice.)

The RF transmitter on your remote control is now deactivated. To reactivate the RF transmitter, See “Activating the RF Transmitter” above.

## RESTORING FACTORY DEFAULT SETTINGS

To reset all the functions of the remote control to the factory defaults (the original, out-of-the-box settings), follow these steps:

1. Press and hold the **MUTE** and **SELECT** keys at the same time until the green light flashes twice, then release both keys.
2. Using the number keys, enter **9-8-1**. (The green light flashes 4 times.)

## TROUBLESHOOTING

**PROBLEM:** Light at the top of the remote blinks when you press a key, but the component does not respond.

**SOLUTION 1:** Try replacing the batteries (see page 7).

**SOLUTION 2:** Make sure you are aiming the DIRECTV® Universal Remote Control at your home entertainment component and that you are within 15 feet of the component you are trying to control.

**PROBLEM:** The DIRECTV Universal Remote Control does not control component or commands are not recognized properly.

**SOLUTION:** Try all listed codes for the device brand being set up. Make sure all components can be operated with an infrared remote control.

**PROBLEM:** TV/VCR combo does not respond properly.

**SOLUTION:** Use the VCR codes for your brand. Some combo units may require both a TV code and a VCR code for full operation (see page 17).

**PROBLEM:** **CHAN▲**, **CHAN▼**, and **PREV** do not work for your RCA TV.

**SOLUTION:** Due to RCA design for certain models (1983-1987), only the original remote control will operate these functions.

**PROBLEM:** Changing channels does not work properly.

**SOLUTION:** If original remote control required pressing **ENTER** to change channels, press **ENTER** on the DIRECTV Universal remote control after entering a channel number.

**PROBLEM:** Remote control does not turn on Sony or Sharp TV/VCR Combo.

**SOLUTION:** For power on, these products require setting up TV codes on the remote control. For Sony, use TV code 10000 and VCR code 20032. For Sharp, use TV code 10093 and VCR code 20048. (See “Controlling Other Components” on page 18.)
