

FCC ID: MG3URC033

Description of the URC-1033BJ0 RF Remote Control

The URC-1033BJ0 RF is a universal remote control that allows users to operate audio/video (A/V) and spa equipment using radio frequency (RF) or infrared (IR) signals. When used in conjunction with the 8-in-1 Command Center receiver, this remote control can operate audio/video equipment up to 100 feet, not necessarily in line of sight with respect to the user. The URC-1033BJ0 RF can also be used as a stand-alone IR remote control unit, and can control up to six A/V devices.

This device is part of an extensive line of infrared and RF remote control products that Universal Electronics Inc. designs, manufactures, and sell in the United States and abroad.
