

The equipment is intended to be implanted in animals for scientific research purposes. Pursuant to Section 2.925(e) for equipment that it is not feasible to put the FCC ID label on the equipment alternate methods are permitted. The "NOTE" at the end of this Section specifically refers to a device that is intended to be implanted within the body of an animal or person a device that could be expected to qualify for an alternate method of identification.

A covering letter is available in the file that provides additional information regarding the labeling provisions for the subject FCC ID.

Below is the FCC ID and the compliance statement that will be added to the instruction manual as an alternate means of identification pursuant to Section 2.925(e) of the Rules.

TX FCC ID MHA20DSI

These devices comply with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference that may cause undesired operation.
