

### 3 GENERAL INFORMATION

#### 3.1 General Description of EUT

<b>Product</b>	:	RF 3D Mouse
<b>Model No</b>	:	RF50201-02
<b>Power Supply</b>	:	3VDC (Battery 1.5V x 2)
<b>Modulation Type</b>	:	FSK
<b>Operating Frequency</b>	:	902 ~ 928 MHz
<b>Operating Range</b>	:	5 meters
<b>Number of Channel</b>	:	8
<b>Radio Data Rate</b>	:	9600 bps
<b>Others</b>	:	N/A

Note: The AeroMouse comes with a multi-function “Wheel” feature that allows fast and easy scrolling. A Mouse Control Panel adds flexibility by providing a series of easy-to-use functions.

Through the use of radio multi-channel technology, the AeroMouse broadcasts at 900 MHz and allows up to eight AeroMouse mice operate simultaneously within the same location. It also turns off automatically when idled for five minutes to save energy.

This class II change certification is different from original submission with minor component change on the RF module.
