RE: RF-LINK SYSTEMS, INC.

FCC ID: MIBRF50702-02

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The antenna connectors listed in the application (page 47 of test report) state that the connectors are an MMCX. This may be the connector at the EUT antenna port, however it appears that the connectors at the antennas may be SMA. Please comment on the type of connectors that these are.
- 2) Page 5 & 6 of the users manual mentions and shows attaching the device to a laptop. It is our understanding that this device is only for integration only into access points and similar devices. Please correct the users manual.
- 3) Please update page 4 of the users manual to include the proper FCC ID Number.
- 4) FYI, The maximum conducted power measured was 25 mW. Part 15.247 devices should list the conducted power (not EIRP) on the 731 form.
