Subject: RE: FCC Certification for the CM-350 VHF Radio

Mr. Estrella,

Most manufacturers send the FAA notification at the same time as the FCC filing and then add the formal acknowledgement letter once the FAA Spectrum Office completes their review. The FAA Spectrum Office uses either a copy of the test data provided by the test lab or reviews the test data posted to the FCC website. We will send a formal letter to the FCC and provide you with a PDF copy of that letter for your records.

This is the acknowledgement letter that you would typically upload to the FCC site.

Don Nellis

P. S. You may include any of my e-mail in you filing to the FCC.

Subject RE: FCC Certification for the
CM-350 VHF Radio

Mr. Nellis,

Thanks for letting me know that you have received the notification letter indicating our intent to file for FCC certification on the CM-350 VHF Radio. We have been awaiting for an acknowledgement letter from the FAA so that we could proceed with the filing through Intertek Testing Services (ITS) who is a TCB for the FCC. We were told that this letter was required prior to submitting the filing package.

Therefore, would it be ok to use your email as acknowledgement or should we be receiving a formal letter in the mail? As soon as I get the ok I will submit the filing package to ITS, and I'm sure they will start uploading the data/information onto the FCC database rather quickly.

Please advise and thanks for your help.

Regards,
Gil Estrella

Subject: FCC Certification for the CM-350 VHF Radio

Dear Mr. Estrella,

I have been assigned to review the General Dynamics application for FCC Certification off the CM-350 VHF Radio Transmitter. In order to complete this task I need access to the test data that you submitted to the FCC. Therefore, I need the FCC ID number for your system along with the Form 731 Confirmation Number so I can access the data from the FCC website. Once I have access to the data, I should be able to complete the review in a few days.

Thanks for your assistance,

Don Nellis
