Re: Class II Permissive Changes including Frequency Change - FCC ID: MIJCM350V

General Dynamics C4 Systems has submitted a Class II Permissive Change request for the CM-350 VDT under FCC ID: MIJCM350V. One of the changes includes reducing the lower operating frequency of the radio from 118 MHz (Original Grant) to 117.975 MHz. This extension is being implemented via software modification only, without any hardware or RF characteristic changes to the Radio.

It has been confirmed that 117.975 MHz is still within the Aeronautical Mobile /Air Traffic Control (ATC) frequency allocation under 47 CFR Part 2.106, Table of Frequency Allocations, and 47 CFR Part 87 for Aviation Services. Therefore, this frequency change complies with the Grant frequency policy of KDB 634817 since it is still within the allowed frequencies per the applicable rule part and allocation chart.

Also, please confirm that both the 5K60A3E and 6K00A3E emission designators will be included for this Class II permissive change as noted on the original grant. For some reason when I was generating the on-line application both designators failed to appear in the final copy.

Please contact me by telephone at (480) 441-3725 or by email at Gil.Estrella@gdc4s.com if there are any questions or if additional information is needed regarding this Class II submittal.

Thank you very much.

Regards,

Gil Estrella
