SUBJECT: REQUEST FOR EXTENSION ON SUBMITTAL OF SAR & EMC TEST REPORTS

REFERENCES: (a) FCC ID MIVCFS0100PS2C
(b) Form 731 Confirmation Number: EA749361

Enfora, Inc. submitted the Reference (a) application, confirmation number Reference (b), on February 11, 2002. Shortly after the submittal we encountered manufacturing issues with the device metal housing that we have not been able to resolve in a timely manner. We therefore decided to change to a plastic material for the housing.

We recognize that this material change potentially affects the RF and EMC emission characteristics of the device, and the decision was made to re-test to ensure compliance with FCC requirements is maintained.

It is therefore respectfully requested that the SAR and EMC test reports submittal date be extended to no later than March 22, 2002. However, we anticipate having the re-tests accomplished and the appropriate test and compliance information submitted prior to that date.

In summary, Enfora, Inc. continues to diligently make every effort in good faith to ensure that all applicable FCC requirements will be met for our devices. If you have any questions or need additional information, please contact the undersigned, or Mr. Jonathan Hughes with Celltech Research Inc. at 250-860-3130.

Sincerely,

A handwritten signature in black ink, appearing to read "Durward E. Rutledge".

Durward E. Rutledge, P.E.
