Overview

Class II permissive change to allow collocation of FCC ID: MIVGSM0408 with FCC ID: U9R-W2SW0001 and FCC ID: PI401B installed in Laird Technologies, Model APAG BT400 access point. All radios have remained un-changed. The access point will be installed to assure greater than 20 cm separation from all persons. Since simultaneous transmission is possible, MPE estimates have been submitted in support of the collocated antennas and transmitters.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
