FCC Modular approval request

Subject: Modular Approval Application

FCC ID: **MIVLPP0208**

Enfora, Inc., requests modular approval for our **LPP0208** module FCCID **MIVLPP0208**, the module has been designed to meet the following criteria:

1. The module has its own shielding and does not rely on any shielding from integrating the module into a final product.
2. The module has interfaces that are digital and do not allow excessive data rates or over-modulation to occur.
3. The module will operate with input power in the range 3.3 to 4.5 VDC
4. The external antenna connector provided on the PCB is considered a unique connector.
5. The module has been tested as a stand-alone device.
6. The module is labelled with a unique FCC Identifier and the integration guide documents the requirement for an external label if the module label will not be visible in the final product.
7. The integration guide has been provided with this application.
8. The module complies with the RF Exposure requirements defined for devices operated at >20cm from the user.

Sincerely

A handwritten signature in black ink, appearing to read "Rob Holden", with a long horizontal line extending to the right.

Rob Holden
