

iWavePort WLU108G

Wireless 108Mbps Super-G XR USB 2.0 Adapter

Operational Description

This device is a 2.4GHz Wireless USB Card which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps&108Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps or 108Mbps, the 11Mbps data rate with CCK technique will be applied.

The transmitter of the EUT is powered by host equipment and connected with USB port. The antennas are PCB antenna . Under normal use condition, the user has to keep at least 20cm separation distance between radiator and the body of the user.

For other detailed instructions, please refer to the user manuals.
