NB	1100 E Chalk Creek Road Coalville, UT 84017 (435) 336-4433 FAX (435) 336-4436	RF Exposure Statement SAR Exclusion Worksheet		
DNB Job Number:	86022	Date: 28 Dec 2017	Conformance Standard	
Customer:	Orbit Irrigation Products		47 CFR 2.1091 (Mobile)	
Model Number:	BH1	FCC ID: ML6-BH1	47 CFR 2.1093 (Portable)	
Description:	WiFi Transmitter		Guidance Document KDB 447498 D01	

SAR EXCLUSION CALCULATIONS per Clause 4.3.1		
Step 1	SAR test exclusion thresholds for 100MHz to 6GHz at test separation distances \leq 50mm	
	Powered allowed at numeric threshold for a distance of 50mm	96
	Maximum test separation distance from step 1 in mm	50
	Frequency in GHz	2.462
	Threshold calculation =	3
	Is the threshold calculation below (3.0) the 1-g SAR for head and body	YES
	Is the threshold calculation below (7.5) the 10-g SAR for extremity	YES
Step 2	SAR test exclusion thresholds for 100MHz to 6GHz at test separation distances > 50mm	
2a	Test separation distance in mm	80
2b	Maximum power of EUT in mW (including production tolerances)	302
2c	Calculated maximum allowed power at test separation distance in mW	396
2d	If 2b is less than 2c EUT meets the requirements of clause 4.3.1 (PASS or FAIL)	PASS

SAR EXCLUSION Comparison to Appendix B			
	SAR test exclusion thresholds for 100MHz to 6GHz from Appendix B		
	Maximum Power of Channel, including tune up tolerance in mW	302	
	Maximum allowed power in Appendix B at specified test distance of 80mm	596	
	Is the Maximum Channel Power below the Appendix A threshold for head and body	YES	
	Is the Maximum Channel Power below the Appendix A threshold for extremity	YES	

CONCLUSIONS EUT is compliant with the SAR Exclusion per Clause 4.3.1 and per Appendix B - No further SAR or MPE measurements or calculations are required.
