Issued date : November 30, 2017 : MLBHLSS-2B FCC ID

# RADIO TEST REPORT

**Test Report No.: 11993428H** 

**Applicant** Honda Lock Mfg.Co.,Ltd.

**Type of Equipment Smart system (FOB)** 

Model No. **HLSS-2B** 

**Test regulation** FCC Part 15 Subpart C: 2017

**FCC ID MLBHLSS-2B** 

**Test Result** Complied

- This test report shall not be reproduced in full or partial, without the written approval of UL Japan, Inc.
- The results in this report apply only to the sample tested.
- This sample tested is in compliance with above regulation.
- 4. The test results in this report are traceable to the national or international standards.
- This test report must not be used by the customer to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the Federal Government.
- This test report covers Radio technical requirements. It does not cover administrative issues such as Manual or non-Radio test related Requirements. (if applicable)

Date of test:

October 25 and 31, 2017

Representative test engineer:

Masafumi Niwa

Engineer

Consumer Technology Division

Approved by:

Shinichi Miyazono

Engineer

Consumer Technology Division

### **SECTION 1: Customer information**

Company Name : Honda Lock Mfg.Co.,Ltd.

Address : 3700,Shimonaka, Sadowara-cho Miyazak-shi, Miyazaki Pref,880-0293

Japan

Telephone Number : +81-50-3757-5700 Facsimile Number : +81-28-680-1045 Contact Person : Sadanori Watarai

### **SECTION 2:** Equipment under test (E.U.T.)

#### 2.1 Identification of E.U.T.

Type of Equipment : Smart system (FOB)

Model No. : HLSS-2B

Serial No. : Refer to Clause 4.2
Rating : DC 3 V (CR2032)
Receipt Date of Sample : October 23, 2017

Country of Mass-production : Vietnam

Condition of EUT : Production prototype

(Not for Sale: This sample is equivalent to mass-produced items.)

Modification of EUT : No Modification by the test lab

#### 2.2 Product Description

Model No: HLSS-2B (referred to as the EUT in this report) is the Smart system (FOB).

**General Specification** 

Clock frequencies in the system : 16 MHz (CPU), 13.0000 MHz (XTAL)

**Radio Specification** 

Radio Type : Transceiver
Frequency of Operation : 433.92 MHz
Modulation : FSK
Power Supply (radio part input) : DC 3.0 V
Antenna type : Pattern antenna

Radio Type : Receiver Frequency of Operation : 125 kHz \*1)

# UL Japan, Inc. Ise EMC Lab.

4383-326 Asama-cho, Ise-shi, Mie-ken 516-0021 JAPAN

<sup>\*1)</sup> The test of receiver part was performed separately from this test report, and the conformability is confirmed.

Test report No. : 11993428H Page : 5 of 18

Issued date : November 30, 2017 FCC ID : MLBHLSS-2B

## **SECTION 3:** Test specification, procedures & results

#### 3.1 Test Specification

Test Specification : FCC Part 15 Subpart C

FCC Part 15 final revised on November 2, 2017

Title : FCC 47CFR Part15 Radio Frequency Device Subpart C Intentional Radiators

Section 15.231 Periodic operation in the band 40.66-40.70 MHz and above 70 MHz.

#### 3.2 Procedures and results

| Item  | Test Procedure  | Specification  | Worst margin                           | Results  | Remarks  |
|---|---|--|--|----------|----------|
| Conducted emission                              | FCC: ANSI C63.10:2013 6 Standard test methods  IC: RSS-Gen 8.8  IC: RSS-Gen 8.8 |  | N/A                                    | N/A*1)   |          |
| Conducted emission                              |   |  | IV/A                                   | N/A·1)   | -        |
| Automatically Deactivate                        | FCC: ANSI C63.10:2013<br>6 Standard test methods                                | FCC: Section 15.231(a)(1)                                  | N/A                                    | Complied | Radiated |

Note: UL Japan, Inc.'s EMI Work Procedures No. 13-EM-W0420 and 13-EM-W0422.

#### FCC Part 15.31 (e)

This test was performed with the New Battery (DC 3.0 V) during the tests. Therefore, the EUT complies with the requirement.

#### FCC Part 15.203 Antenna requirement

The antenna is not removable from the EUT. Therefore, the equipment complies with the antenna requirement of Section 15.203.

# UL Japan, Inc. Ise EMC Lab.

4383-326 Asama-cho, Ise-shi, Mie-ken 516-0021 JAPAN

<sup>\*</sup> The revision on November 2, 2017, does not affect the test specification applied to the EUT.

<sup>\*</sup> Also the EUT complies with FCC Part 15 Subpart B.

<sup>\*1)</sup> The test is not applicable since the EUT does not have AC Mains.

Test report No. : 11993428H Page : 6 of 18

**Issued date** : November 30, 2017 FCC ID : MLBHLSS-2B

#### 3.3 Addition to standard

| Item                       | Test Procedure  | Specification    | Worst margin | Results  | Remarks  |
|----------------------------|-----------------|------------------|--------------|----------|----------|
| 99 % Occupied<br>Bandwidth | IC: RSS-Gen 6.6 | IC: RSS-210 A1.3 | N/A          | Complied | Radiated |

Other than above, no addition, exclusion nor deviation has been made from the standard.

#### 3.4 Uncertainty

#### **EMI**

The following uncertainties have been calculated to provide a confidence level of 95 % using a coverage factor k = 2.

|                      |                   | Radiated emission   | on (Below 1 GHz)  |                     |
|----------------------|-------------------|---------------------|-------------------|---------------------|
| Polarity (3 m*)(+/-) |                   | (10 r               | n*)(+/-)          |                     |
|                      | 30 MHz to 200 MHz | 200 MHz to 1000 MHz | 30 MHz to 200 MHz | 200 MHz to 1000 MHz |
| Horizontal           | 5.0 dB            | 5.3 dB              | 5.0 dB            | 5.0 dB              |
| Vertical             | 5.2 dB            | 6.3 dB              | 5.0 dB            | 5.0 dB              |

| Radiated emission (Above 1 GHz) |                 |                    |                    |                 |  |  |  |
|---------------------------------|-----------------|--------------------|--------------------|-----------------|--|--|--|
| (3 m <sup>2</sup>               | *)(+/-)         | (1 r               | (10 m*)(+/-)       |                 |  |  |  |
| 1 GHz to 6 GHz                  | 6 GHz to 18 GHz | 10 GHz to 26.5 GHz | 26.5 GHz to 40 GHz | 1 GHz to 18 GHz |  |  |  |
| 5.2 dB                          | 5.5 dB          | 5.5 dB             | 5.4 dB             | 5.5 dB          |  |  |  |

<sup>\*</sup> Measurement distance

#### Radiated emission test(3 m)

[Electric Field Strength of Fundamental Emission]

The data listed in this report meets the limits unless the uncertainty is taken into consideration.

[Electric Field Strength of Spurious Emission]
The data listed in this test report has enough margin, more than the site margin.

Issued date : November 30, 2017 FCC ID : MLBHLSS-2B

#### **SECTION 5: Radiated emission (Electric Field Strength of Fundamental and Spurious Emission)**

#### **Test Procedure and conditions**

#### [For below 1GHz]

EUT was placed on a urethane platform of nominal size, 0.5 m by 1.0 m, raised 0.8 m above the conducting ground plane. The Radiated Electric Field Strength has been measured in a Semi Anechoic Chamber with a ground plane.

#### [For above 1GHz]

EUT was placed on a urethane platform of nominal size, 0.5 m by 0.5 m, raised 1.5 m above the conducting ground plane. The Radiated Electric Field Strength has been measured in a Semi Anechoic Chamber with absorbent materials lined on a ground plane.

Test was made with the antenna positioned in both the horizontal and vertical planes of polarization. The measurement antenna was varied in height above the conducting ground plane to obtain the maximum signal strength. Photographs of the set up are shown in Appendix 3.

#### [Transmitting mode]

#### (Below 30 MHz)

The noise level was checked by moving a search-coil (Loop Antenna) close to the EUT.

#### (Above 30 MHz)

The Radiated Electric Field Strength has been measured on Semi anechoic chamber with a ground plane and at a distance of 3 m. The measuring antenna height was varied between 1 and 4 m and EUT was rotated a full revolution in order to obtain the maximum value of the electric field strength.

The measurements were performed for both vertical and horizontal antenna polarization.

The radiated emission measurements were made with the following detector function of the test receiver / spectrum analyzer.

### Test Antennas are used as below;

| Frequency    | Below 30 MHz | 30 MHz to 200 MHz | 200 MHz to 1 GHz | Above 1 GHz |
|--------------|--------------|-------------------|------------------|-------------|
| Antenna Type | Loop         | Biconical         | Logperiodic      | Horn        |

|           | From 9 kHz<br>to 90 kHz<br>and<br>From 110 kHz<br>to 150 kHz | From<br>90 kHz to<br>110 kHz | From<br>150 kHz<br>to 490 kHz | From<br>490 kHz<br>to 30 MHz | From<br>30 MHz<br>to 1 GHz | Above 1 GHz         |
|-----------|--|------------------------------|-------------------------------|------------------------------|----------------------------|---------------------|
| Detector  | Peak   | Peak                         | Peak                          | Peak                         | Peak and                   | Peak and            |
| Type      |  |                              |                               |                              | Peak with                  | Peak with           |
|           |  |                              |                               |                              | Duty factor                | Duty factor         |
| IF        | 200 Hz   | 200 Hz                       | 9.1 kHz                       | 9.1 kHz                      | 120 kHz                    | PK: S/A: RBW 1 MHz, |
| Bandwidth |  |                              |                               |                              |                            | VBW: 3 MHz          |

<sup>-</sup> The carrier level (or, noise levels) was (or were) measured at each position of all three axes X, Y and Z, and the position that has the maximum noise was determined.

Noise levels of all the frequencies were measured at the position.

Measurement range : 9 kHz - 4.4 GHz

Result = Reading + Ant Factor + Loss (Cable+Attenuator+Filter) - Gain(Amprifier) + Duty factor

#### Sample calculation:

Result of PK = Reading + Ant Factor + Loss (Cable + Attenuator + Filter) - Gain (Amplifier)

Result of PK with Duty factor = Reading + Ant Factor + Loss (Cable + Attenuator + Filter) - Gain (Amplifier) + Duty factor (Refer to Duty factor data sheet)

For above 1GHz: Distance Factor:  $20 \times \log (3.75 \text{m}/3.0 \text{ m}) = 2.50 \text{ dB}$ 

\*Other frequency noises omitted in this report were not seen or had enough margin (more than 20dB).

Since the peak emission result satisfied the average limit, duty factor was omitted.

Although Duty of this product was 100% or less, the result of AV (PK with Duty factor) was calculated by applying Duty 100% as worst.

### -20dB and 99% Occupied Bandwidth

Test place Ise EMC Lab. No.2 Semi Anechoic Chamber

Report No. 11993428H Date 2017/10/31

Temperature/ Humidity 21 deg. C / 45 % RH

Engineer Ken Fujita

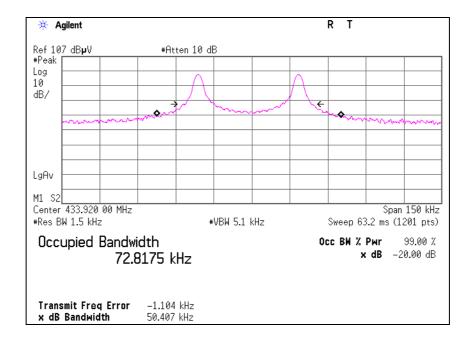

Mode Transmitting mode

Bandwidth Limit: Fundamental Frequency 433.92 MHz x 0.25% = 1084.80 kHz

\* The above limit was calculated from more stringent nominal frequency.

| -20dB Bandwidth<br>[kHz] | Bandwidth Limit<br>[kHz] | Result |
|--------------------------|--------------------------|--------|
| 50.407                   | 1084.80                  | Pass   |

| 99% Occupied Bandwidth | Bandwidth Limit | Result |
|------------------------|-----------------|--------|
| [kHz]                  | [kHz]           |        |
| 72.8175                | 1084.80         | Pass   |

The expiration date of the calibration is the end of the expired month.

All equipment is calibrated with valid calibrations. Each measurement data is traceable to the national or international standards.

As for some calibrations performed after the tested dates, those test equipment have been controlled by means of an unbroken chains of calibrations.

#### **Test Item:**

RE: Radiated emission, 99 % Occupied Bandwidth, -20 dB bandwidth, Automatically deactivate and Duty cycle tests

4383-326 Asama-cho, Ise-shi, Mie-ken 516-0021 JAPAN
