RE: Miltel Communications Ltd.

FCC ID: MLLIGL2RPT450

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) FYI.....RBW settings for occupied bandwidth should be > 1% of the measured bandwidth. Please be sure to test appropriately on future applications.
- 2) Please provide information and photographs if possible regarding the antennas used with the system.
- 3) Please consider adding information to the users manual regarding licensing requirements. Examples of this are:

The equipment user is required by the radio service rules to obtain a license before operating the equipment.

Licensing of this equipment is the user's responsibility, and licensability depends on the user's classification and application, and on the selected frequency. The user is strongly urged to contact the appropriate telecommunications authority concerning proper licensing, and before choosing and ordering frequencies.

- 4) Please provide calculations to support emissions designator.

Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
