

Operational Description

Your Midland model G-9 UHF FM GMRS two-way radio is designed to provide you with line-of-sight communications for a range up to 5 miles. The model G-9 incorporates channels with 38 different CTCSS codes to provide the best in quiet communications. Also this radio offers scan, power save, 9 memory channels and a multifunction back-lighted liquid crystal display. This unit also incorporates VOX (voice operated transmit) that allows hands free use when the radio is equipped with certain accessories.
