Federal communications commission
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21046

SUBJECT : FCC ID: MMALXT314

To Whom It May Concern:

This will serve as a Class 2 Permissive Change request for the above mentioned FCC Identifier.

The manufacturer is going to make an economic version of the original model LXT314(FCC ID:MMALXT314), which has less features with the deletion of the following functions - SAW Filter to L,C circuitry, Vibrator function, Animal Sound Call function, and Call function - with the same PCB.

We have performed harmonics emissions and there is no degradation from the original test data and there is no change in the output power. The data in the test report shows that it still continues to meet the FCC requirements for this class of equipment.

Should you have any questions or require any further information, please advise.

Regards,

K. M. Choi
Engineer
