Class II Permissive Change Description

This transmitter module was previously certified under MMURTI1500 on 11/02/2010 as a dual transmitter module, containing a 433MHz transmitter and a 2.4GHz transmitter. The 433MHz transmitter used an On-Off Keying (OOK) modulation scheme on one channel. This Class II Permissive Change is to add a new modulation scheme, Gaussian-shaped Frequency Shift Keying (GFSK), including a multi-channel system using 13 channels. The 2.4GHz transmitter remains unchanged and operates according to the original certification.
