

## **2. 4G wireless mouse manual (v6.0)**

### **MAIN FEATURES:**

1. Compatible with USB1.1/2.0 specifications, Pass USB - IF and WHQL certification
2. 16 channels with strong ability to resist interference
3. Excellent RF characteristics, to ensure the distance/non-directional
4. Full speed USB, two modes, the game modes (250 hz)  
office modes(125 hz) , Can switch online 250/125 hz switch
5. Built-in two low pressure detection
6. Support two way of connecting (hardware for code, PC software to code)
7. Support sensor type:  
PIXART: 3212/3205/3205L/3204UL/V108/8513/8640/OM15s  
AVAGO: A3000  
Built-in sensor optimization algorithm, guarantee the smooth
8. Six function keys: left key, in the key, right, forward, back button, the DPI button  
special support 4 key / 5 key/DPI button - can reset button definition through the software code
9. Support keyboard and mouse combo

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

#### Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement in portable exposure condition without restriction.
