

The PTX-150 was type approved several years ago as FCC ID MNT-PTX-150 with a modulation designator of 16K0F1D. We would now like to have FCC approval to sell PTX-150s which are factory set for narrowband operation with designator 11K0F1D for the two-level modes of operation. I believe that the attached report (PTX\_NB\_class2.doc) supports this class 2 permissive change.

Best regards,
