Re: FCC Class II Permissive change for FCC ID: MO5COPLT, IC:4397A-MO5COPLT  
(Original Grant date: 12/9/2002)  
Applicant: Johnson Worldwide Associates/Johnson Outdoors

Dear Reviewing Engineer,

This is to request a Class II permissive change for FCC ID: MO5COPLT, IC:4397A-MO5COPLT, originally granted on 12/9/2002.

The major change filed under this application is:

IC designation TDK5100 as seen in the schematics has gone obsolete. It has been replaced with TDK5100F. Testing has been performed and found to not change or degrade the RF properties of the device. The new chip is pin-for-pin compatible with the original and meets the requirement for FCC KDB 178919 D01, Section III, Paragraph D, item 2.

Sincerely,

Technical Manager  
NCEE Labs  
Acting as an agent on behalf of Johnson Worldwide Associates/Johnson Outdoors
