Declaration of Compliance to RF Exposure Limits for Humans

The RI-15HTY transmitter complies with the RF exposure limits for humans as called out in RSS-102. The transmitter is used in a vehicle immobilizer system. It is exempt from RF evaluation based on its operating frequency of 134.2 kHz, and output power less than 121 microwatts based on $TP = (FS \times D)^2 / 30 \times 1.64$, $(25703 \text{ uV/m} \times 3)^2 / 30 \times 1.64$. This would be less than the 1.5 watt requirement for a mobile device.
