RE: FCC ID: MQ4SDW3100 Request for supercede of NII Test report and users manual

Please replace originally uploaded NII test report and users manual with those revised versions of each uploaded 3/6/09.

The reason for this request is due to the fact that the original documents did not show the frequency bands for the NII broken up, instead it was one large band : 5180 – 5320. The revised docs reflect the 3 ranges.

Thank you
