

Dear Timothy,

Thanks for your information. We have modified the report as per your review comments and have the file attached for your review. Please see the explanation below:

- 1) We conducted the SAR test per your requirement.
Please find the SAR report as file attached for your review.
- 2) We modified the user's manual as per your requirement and have it attached for your reference.
- 3) About 6 dB bandwidth was incorrectly measured:
we remeasured and modified it in section 3 in FCC report.
Please find the FCC report as file attached for your review.
- 4) About difference between the Reading column in dBm and the output power in dBm column:
we modified it in section 4 (page 12 of 38) of FCC report as file attached for your review.
- 5) Page 19 of 38 of the test report contains an additional column "Average Factor":
We have modified it (in page 19 of 38). Please also find the revised FCC report for your review.
- 6) About question 6, that's because we add 10dB external attenuator.

I hope the supplementary satisfy all your requirement for reviewing this application.
If you have further question, please feel free to let me know.

Best Regards
Sunny Liu
