To Whom It May Concern:

Please be advised that the A700 Family Series Terminals, Combo Bluetooth/IEEE 802.11a/b/g/n Wireless LAN, and 13.56MHz RFID product is manufactured for the global market but when marketed in North America under FCC ID: MQO-TAP900-01 and IC: 2570A-TAP90001, the EEPROM will be programmed at the factory to only operate and actively scan on these specific 5GHz band channels: Channels 36, 40, 44, 48, 149, 153, 157, 161, and 165.

The following 5GHz band channels will be programmed at the factory to passively scan and will only listen and cannot send a probe request to initiate communication on these specific channels. In addition, Ad-hoc mode is always disabled on these passive channels: Channels 52, 56, 60, 64, 100, 104, 108, 112, 116, 132, 136, and 140.

This information when programmed into the EEPROM will not be accessible and cannot be changed by the end user.
