

List of the measures
that Satel Oy has taken in preventing the unauthorised operation of
SATELLINE-3AS radio modem
at 406.0 – 406.1 MHz band

1. The following text has been added to the user's manual.

<p>WARNING! Users of SATELLINE-3AS (d) radio modem in North America should be aware, that due to the allocation of the frequency band 406.0 – 406.1 MHz for government use only, the use of radio modem on this frequency band without a proper permit is strictly forbidden.</p>
--

2. The production personal has been informed to set the lower and upper frequency limits of the equipment so that a customer will not be able to change the operating frequency to the band 406.0-406.1 MHz.
