A Class II Permissive Change Application for Type Approve the variant under the existing certificate

Dear Sir / Madam,

We have type approval certification for our radio modem SATELLINE-3AS(d)/125 (FCC ID: MRBSATEL-3AS-125). Now we would like to apply our new variant SATELLINE-3ASm/125/LC under the same certificate with a few changes. The technical differences are described in the following document 3ASm_technical_description_of_changes_FCC. There is attached the test report of the spurious emissions of the new housing Test_Report_Nemko_1031840 as well.

Yours sincerely,

SATEL Oy
