**A Class II Permissive Change Application for Type Approve the variant
under the existing certificate**

Dear Sir / Madam,

We have type approval certification for our radio modem module SATELLINE-TR1 (FCC ID: MRBSATEL-TA13, also having marketing names SATELLINE-EASy, SLR5 and GFU27). Now we would like to add our new wider frequency range under to the same certificate.

The schematics, layouts and block diagram are the same. New part list is attached to application. Also 2 test reports are attached, Occupied Bandwidth and Sideband Spectrum.

Yours sincerely

SATEL Oy
