

SATEL Oy, as a manufacturer, states that SATELLINE-M3-TR3 radio data modem transceiver module supports operation on a 12.5 or 25 kHz channel within 403-473 MHz frequency range.

When SATELLINE-M3-TR3 radios are delivered to North American customers, the operating frequency range will be limited by the factory setup to the sub bands 406.1-430 MHz and 450-470 MHz.

SATEL Oy acknowledges that it is a violation of FCC and IC rules if the device operates on unauthorized frequencies.
