Dear Ms. Diane Poole

Thanks for your email addressed to Mrs Marita Latovehmas at SATEL Oy.

Referring to the items of your request, the following information has been prepared.

SATEL Oy, as a manufacturer of SATELLINE-3AS Epic Pro 35W radio modems,

states that the frequencies 406.0 – 406.1 MHz can be rejected by the manufacturer. When ordering modems from SATEL Oy, the customer needs to advise the country where it is going to be shipped. When the country code is US, the production does not adjust the operation frequency within frequencies 406.0 – 406.1 MHz. The end user can't change that operation frequency afterwards. On the contrary the modem is always operating in frequency adjusted in factory.

Salo, Finland, December 7th, 2009

Marita Latovehmas
SATEL Oy
