

Correspondence Reference Number: 38295
Form 731 Confirmation Number: EA531345

Dear Ms. Diane Poole

Thanks for your email addressed to Mrs Marita Latovehmas at SATEL Oy.

Referring to the items of your request, the following information has been prepared.

1. Confidentiality to the internal Photos: Hereby confirming that internal EUT photos need not to be held confidential.

2. Emission designator 20KF1D: There is a false statement. The right one is

20K0F1D (=Frequency modulated digitized non-voice)

Referring to FCC/Industrial/Business/Licensing:

FCC Form 601 requests the emissions of the transmitter. Emissions are designated according to their classification and the necessary bandwidth. Three symbols are used to describe the basic characteristics of radio waves. Emissions are classified and symbolized according to the following characteristics:

- First Symbol - type of modulation of the main carrier.
- Second Symbol - nature of signal(s) modulating the main carrier.
- Third Symbol - type of information to be transmitted.

20K0 = The first four characters identify the necessary bandwidth required to transmit the desired information at the rate and with the quality required for the system employed;

F = Frequency modulation

1 = A single channel containing quantized or digital information without the use of a modulating sub-carrier, excluding time-division multiplex

D = Data transmission, telemetry, telecommand

If any further information is needed for the application procedure, please do not hesitate to contact us at Satel.

Kind Regards,
Satel Oy
Marita Latovehmas
