

RE: Schrader Electronics Limited
FCC ID: MRX-GMXFM315

The following is in response to the comments made on the above application

1) The operational description states on page one that 1 transmission occurs per minute, while on page 2 it states that a transmission occurs every 32 seconds. Please comment and correct this exhibit.

The exhibit has been corrected. The transmission occurs every 32 seconds.

2) The parts list and board layout appear to be for a different version of the device. Please explain or correct.

The parts list and layout are correct for the device. We have re-uploaded the file incase there was a mistake in uploading earlier.

3) The EUT was tested to 3.15 GHz, but the test equipment list does not show what antenna was used > 1 GHz.

The Ridge Horn Antenna was used. A revised test report has been uploaded.

4) The list of operational modes references a letter regarding the Alarm mode, which is not provided. Please comment.

The description of operation has been updated. Please see exhibit.
