RE: Schrader Electronics Limited

FCC ID: MRX-GMXFM315

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The operational description states on page one that 1 transmission occurs per minute, while on page 2 it states that a transmission occurs every 32 seconds. Please comment and correct this exhibit.
- 2) The parts list and board layout appear to be for a different version of the device. Please explain or correct.
- 3) The EUT was tested to 3.15 GHz, but the test equipment list does not show what antenna was used > 1 GHz.
- 4) The list of operational modes references a letter regarding the Alarm mode, which is not provided. Please comment.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
