Dear sir/madam,

Model names: AHMPD4 and ATAPC4

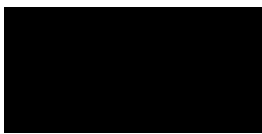

Please be aware that the Antenna in both the above Models is named as being an Integral Antenna, in fact these are trace Antenna's.

The photographs are listed as being confidential in the application as the circuit board or internal components are not accessible to users.

These parts are Tyre Pressure Monitoring sensors and are mounted on the inside of a tyre rim. They are also coated in epoxy and would be damaged if the epoxy was removed.

I hope that these clarifications are sufficient.

Regard and thanks

Schrader Electronics Ltd
