Re: Certification for Schrader Electronics BBFPL4  
IC: 2456A-BBFPL4

If necessary, we have enclosed application materials for certification of Schrader Electronics BBFPL4. It has been verified to comply with ISSED RSS-210v10/GENv5.

**Current Variants:**

There is only a single variant of the EUT, as tested.

**History:**

Original Grant: March, 2023; FCC ID: MRXBBFPL4; IC: 2546A-BBFPL4, Model: BBFPL4.

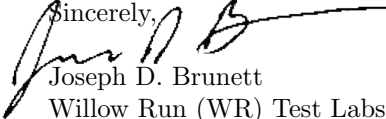

**Changes Made:**

The product remains electrically identical, but additional modes of operation (encodings) are added to both the periodic and manually activated transmissions. These modes do no change the worst case product duty cycle.

**Action Taken:**

EUT samples employing the new encodings were fully tested and demonstrate ongoing compliance.

The changes made qualify as a permissive change for IC (ref. IC RSP-100). If there are any questions regarding the application or testing performed, please contact us at the above address or call (734) 252-9785, or e-mail info@wrtest.com.

Sincerely,  
  
Joseph D. Brunett
