

Manufacturer: Schrader Electronics

Model: EG53MA4

Original FCC Identifier : MRXEG53MA4.

Original IC Canada Identifier : IC:2546A-EG53MA4.

Class II Change / Reassessment Justification

An additional frame protocol (encoding) has been added to this sensor. This is contained within the software load of the ASIC. The PCB, antenna, components, modulation, and performance characteristics of the device are unchanged. The sensor remains identical to the original except for the addition of a secondary protocol.
