Re: Certification for Schrader Electronics G6GB4-F, G6GB4-D  
IC: 2546A-G6GB4

If necessary, we have enclosed application materials for certification of Schrader Electronics G6GB4-F, G6GB4-D. It has been fully tested and found to comply with ISED RSS-210v9/GENv5.

**Current Variants:**

There are two variants of the EUT. Both employ the exact same PCB and software, but the plastic housing (chassis) into which they are placed consist of a smaller version G6GB4-F and a larger version G6GB4-D. Fundamental and harmonic spurious are measured in both housings.

If there are any questions regarding the application or testing performed, please contact us at the above address or call (734) 252-9785, or e-mail info@wrtest.com.

Sincerely  
  
Joseph D. Brunett
