

RE: Schrader Electronics

FCC ID: MRXHH4

IC: 2546A-HH4

ATCB014884

The following is in response to the comments made on the above referenced application.

- 1) One of the cover letters mentions a single variant, but the BOM suggests 2 variants.  
Please explain.

The Alt2 build listed the the BOM is simply a back-up build, made up of the same component values (within tolerance) from different suppliers. The two BOMs are electrically identical and simply relate two builds of the same device.
