RE: Schrader Electronics Limited

FCC ID: MRXOPEL433RX1

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The block diagram should show the frequencies of all oscillators in the device (CFR 2.1033(a)(5)). Please provide an updated version that includes this information.
- 2) Section 3 of the test report references a different FCC ID. Please explain and confirm if this is the correct report for this product. It also appears that the application is to cover 2 models, but this fact is not clear the way it is referenced in section 3.
- 3) FYI, the test report references RSS-210 Issue 2. I believe that IC's current version is Issue 5.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
