

## **Measurement of Maximum Permissible Exposure**

### **1. Foreword**

In adopt with the Human Exposure IEEE C95.1, and according to the FCC 1.1310. The *Maximum Permissible Exposure (MPE)* is obligated to measure in order to prove the safety of radiation harmfulness to the human body.

The *Gain* of the antenna used is measured in an *Anechoic chamber*. The *maximum total power to the antenna* is to be recorded. By adopting the ***Friis Transmission Formula*** and the *power gain of the antenna*, we can find the distance right away from the product, where the limit of the MPE is.

### **2. Description of EUT**

**FCC ID** : MSQBT180

**Product name** : Bluetooth Module

**Model** : BT-180

**Classification** : Mobile Device

(i) Under normal use condition, the antenna is at least 20cm away from the user;  
(ii) Warning statement for keeping 20cm separation distance and the prohibition of operating next to the person has been printed in the user's manual

**Frequency Range** : 2402MHz to 2480MHz

**Supported Channel** : 79 Channels

**Modulation Skill** : GFSK, QPSK

**Power Type** : Powered by USB to 3P-3V converter by Test fixture of client's device

### 3. Limits for Maximum Permissible Exposure (MPE)

Frequency Range (MHz)	Electric Field Strength (V/m)	Magnetic Filed Strength (H) (A/m)	Power Density (S) (mW/cm <sup>2</sup> )	Averaging Time  E <sup>2</sup> ,  H  <sup>2</sup> or S (minutes)
<b>(A) Limits for Occupational/Controlled Exposure</b>				
0.3-3.0	614	1.63	100	6
3.0-30	1842/f	4.89/f	900/f <sup>2</sup>	6
30-300	61.4	0.163	1.0	6
300-1500	--	--	f/300	6
1500-100,000	--	--	5	6
<b>(B) Limits for General Population/Uncontrolled Exposure</b>				
0.3-1.34	614	1.63	100	30
1.34-30	824/f	2.19/f	180/f <sup>2</sup>	30
30-300	27.5	0.073	0.2	30
300-1500	--	--	f/1500	30
1500-100,000	--	--	1.0	30

[The EUT is tested in transmit and receive modes and in the first, middle and the last channel separately. The following shows only our observation have the greatest emissions.]

According to OET BULLETIN 56 Fourth Edition/August 1999, Equation for Predicting RF Fields:

$$\text{Friis Transmission Formula: } S = \frac{PG}{4\pi R^2} = \frac{1.977 \times 1.66}{4\pi (20)^2} = 0.00065 \text{ mW/cm}^2$$

$$\text{Estimated safe separation: } R = \sqrt{\frac{PG}{4\pi}} = \sqrt{\frac{1.977 \times 1.66}{4\pi}} = 0.51 \text{ cm}$$

Remarks: "The safe estimated separation that the user must maintain from the antenna is at least 5.8cm"

Where: S = power density (in appropriate units, e.g. mW/cm<sup>2</sup>)

P = power input to the antenna (in appropriate units, e.g., mW)

G = power gain of the antenna in the direction of interest relative to an isotropic radiator

R = distance to the center of radiation of the antenna (appropriate units, e.g., cm)

The Numeric gain G of antenna with a gain specified in dB is determined by:

$$G = \log^{-1} ( \text{dB antenna gain} / 10 )$$

$$G = \log^{-1} (2.20 / 10) = 1.66$$

## *Appendix*

### **Antenna Specification**

## SPECIFICATIONS

MULTILAYER CHIP ANTENNA

AH 104F2450S1-T

TAIYO YUDEN CO., LTD.

Date : 6.Feb.2006

# MULTILAYER CHIP ANTENNA

## Table of Contents

- 1.0 Scope
- 2.0 Environment condition
- 3.0 Electrical specifications
- 4.0 Mechanical specifications
- 5.0 Reliability test
- 6.0 Packing specification
- 7.0 Precautions

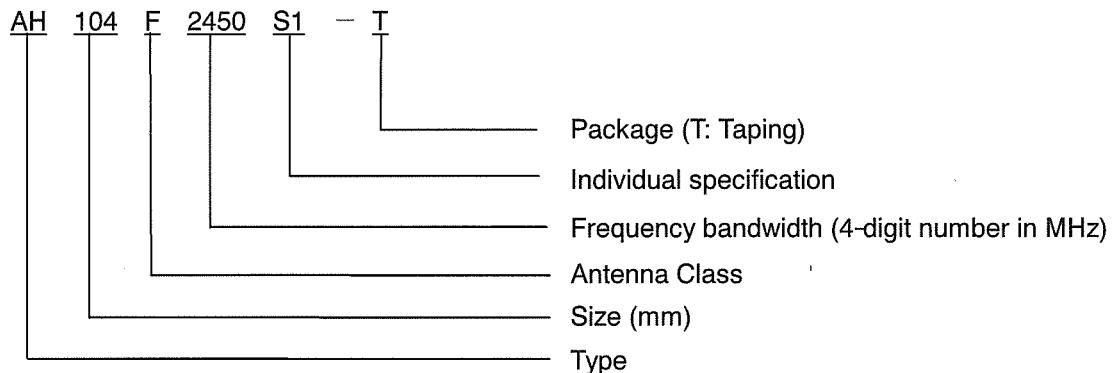

### ※RoHS compliance

- This product conform to "RoHS compliance".
- "RoHS compliance" means that the product does not contain lead, cadmium, mercury, hexavalent chromium, PBB or PBDE referring to EU Directive 2002/95/EC, except other non-restricted substances or impurities which could not be technically removed at the refining process.

## 1.0 Scope

This specification covers the multilayer chip antenna in mounted condition on Taiyo Yuden evaluation board.

### Part Numbering System

## 2.0 Environment condition (Refer to the reliability test of table -1 for the reliability assurance)

- 2.1 Operating temperature range : -20°C to +80°C
- 2.2 Humidity : 15 to 95%RH (Without dew condensation)
- 2.3 Storage temperature range (Antenna of single unit)  
: -40°C to +85°C
- 2.4 Storage temperature and humidity range (packing condition)  
: -10°C to +40°C, 15 to 85% RH

## 3.0 Electrical characteristics

- 3.1 Input Impedance : 50Ω (Specified value )
- 3.2 Frequency bandwidth : 2400 to 2500MHz
- 3.3 Gain<sup>\*1</sup> : +2 dBi min. (Peak)  
: 0 dBi min.  
(Vertical polarization average gain of omni directional plane)  
: -6 dBi min. (Total average gain)
- 3.4 VSWR in bandwidth<sup>\*2</sup> : 2.0 (Typical)

\*1: Total average gain in 3.3 of electrical characteristics shall be total average gain of V, H polarization in X-Y, Y-Z and X-Z side (Average of total measurement points) in mounted on Taiyo Yuden evaluation board.

\*2: VSWR in bandwidth in 3.4 of electrical specification shall be VSWR mounted on Taiyo Yuden on standard board.

## 4.0 Mechanical performance

- 4.1 Shape dimension, indication mark: Refer to figure -1. Sealed letter shall be D47.
- 4.2 Dimension of evaluation board and land-patterns: Refer to figure -2, 3.

## 5.0 Reliability test

Reliability test : To satisfy a reliability test per table -1.

## 6.0 packing specification

Packing form : Refer to pages 10 to 12.

## 7.0 Precautions

Refer to precautions in page 9.

Table 1

## Reliability test

No.	Test Item	Test method	Judgment method <sup>*3</sup>
1	Humidity Test	Electrical characteristic is evaluated after products are left in 60°C and 90% to 95%RH for 96 hours, and then in normal temperature and humidity for 1 hour.	To Satisfy less than 2.0 VSWR in bandwidth.
2	High Temperature Test	Electrical characteristic is evaluated after products are left in the atmosphere of 85°C for 96 hours, and left in normal temperature for 1 hour.	To Satisfy less than 2.0 VSWR in bandwidth.
3	Low Temperature Test	Electrical characteristic is evaluated after products are left in the atmosphere of -40°C for 96 hours, and left in normal temperature for 1 hour.	To Satisfy less than 2.0 VSWR in bandwidth.
4	Thermal Shock	Electrical characteristic is evaluated after products exposed alternately in -40°C and 85°C for every 30minutes for each temperature 10 times, and are left for 1 hour in normal temperature.	To Satisfy less than 2.0 VSWR in bandwidth.
5	Solderability	Products shall be submerged in solder (HS63S) of $230 \pm 5^\circ\text{C}$ for $3 \pm 1$ seconds after products are preheated in PO-Z-7 flux of $150^\circ\text{C}$ . Then these products are picked up and appearance is checked by magnifier of 10 times.	At least 90% of terminal electrode is covered with new solder.
6	Soldering Heat Resistance (Reflow)	An electrical character is evaluated after products is subjected by 2 times reflow by temperature pattern as shown in next page.	To Satisfy less than 2.0 VSWR in bandwidth.

\*3 : Chip antenna on our company standard circuit board is tuned less than 2.0 VSWR in bandwidth and VSWR in bandwidth is measured after the reliability test.

## Reflow soldering temperature profile

### Indication and marker

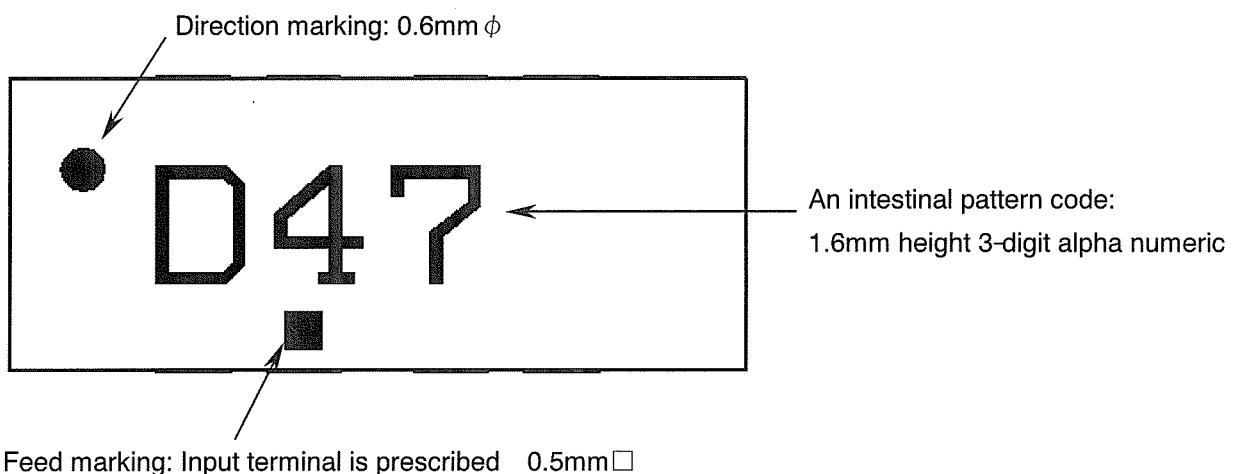

Figure -2  
Dimension of evaluation board for this antenna

- Board material: FR-4
- Thickness of base material: 0.8mm
- Electrode pattern: single-side
- Thickness of electrode:  $35 \mu\text{m}$
- Land part: Refer to figure3

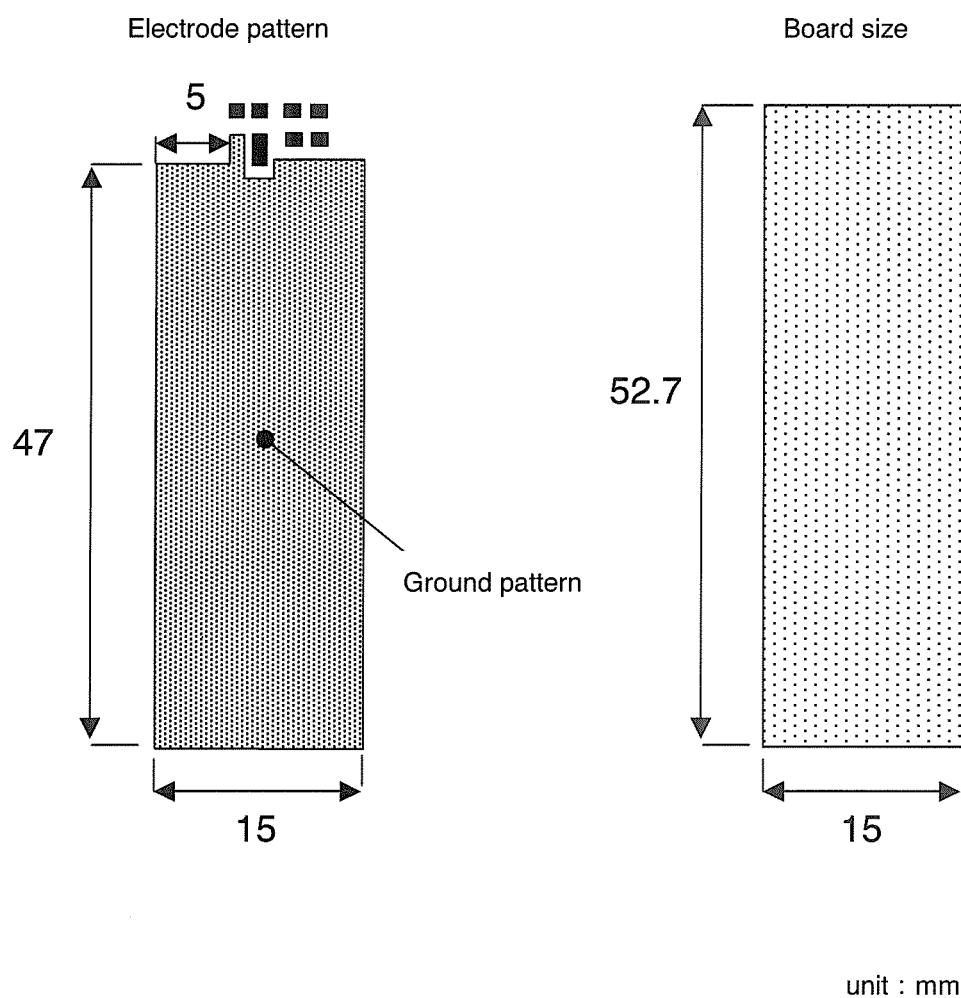

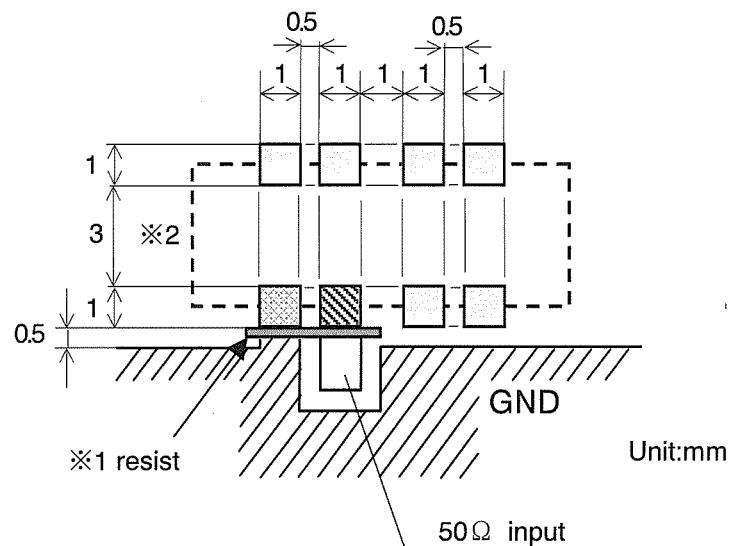

Figure -3

Antenna land-patterns (Tentative)

■ Land for input terminal

■ Land for GND terminal

■ Land for NC terminal

※1 : A solder area is set at solder resist.

※2 : Don't arrange the pattern on near, surface and inside layer to the antenna mounting area.  
(Refer to our company evaluation circuit board.)

## Precautions

1. Be careful of using these products because characteristics may be deteriorated when it is used in the following environment.
  - Special gas atmosphere (Such as Cl<sub>2</sub>, NH<sub>3</sub>, SO<sub>x</sub> and NO<sub>x</sub>, etc.)
  - Gas atmosphere with volatility and flammability
  - Place where dust is abundant
  - Place where water splashes directly, dew condensation is easy to occur because of high humidity, direct sunlight is subjected and freeze.
2. Don't apply excessive pressure and shock because these products are made from ceramics element.
3. Don't apply excessive pressure and shock to these products during transporting and handling of print circuit board that these products are soldered.
4. Be careful of handling (Don't fall and hit) because characteristics changes when electrode is damaged and chipped out. And, don't touch these products with bare hands because it causes a solderability decline.
5. Please storage under the following condition

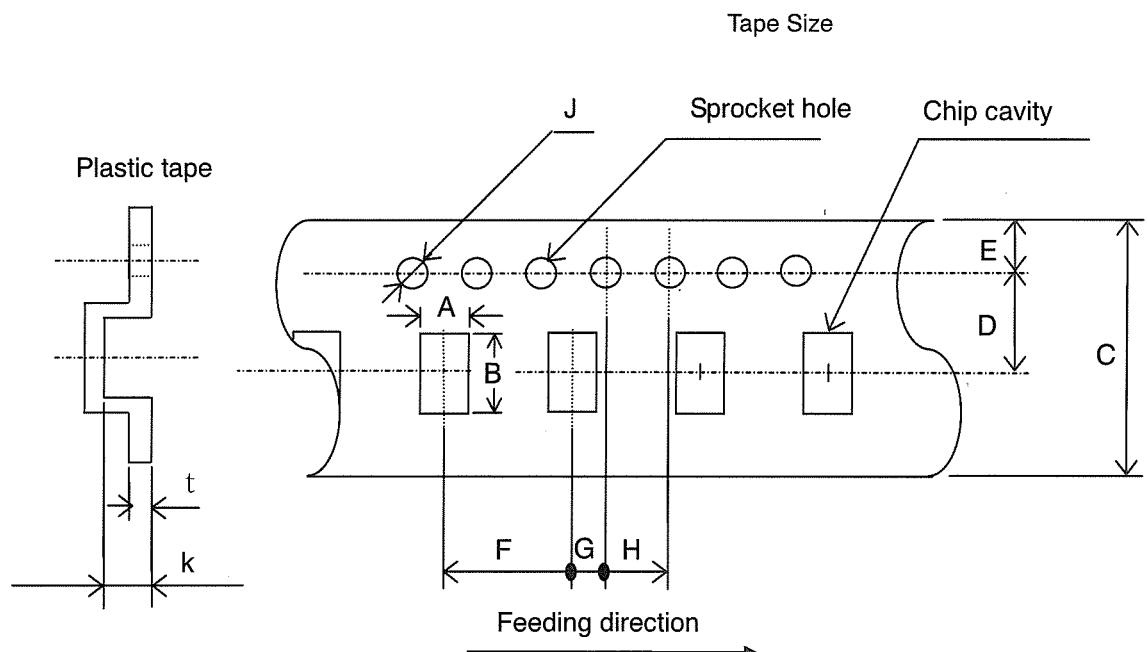

Temperature : Below +40 °C  
Humidity : Below 85% RH

Use these products after the delivery within six months. And, after more than six months have passed, confirm solderability before the use them.
6. Arrange these products of position of mounting where stress isn't applied against sled and deflection of circuit board.

Be careful not to apply stress and deflection of board during process after soldering these products (circuit board cut, break board checker, mounting of other components, installation to chassis and wave soldering to backside of the circuit board after Reflow soldering) because electrode peeling and chip break occur by stress and deflection. When separating print circuit board after mounting, please 7. Be careful not to apply excessive stress and shock to prevent break and chip out during mounting these products on print circuit board.
7. Please use flux containing less than 0.1% wt (cl conversion) of halogen material in soldering to prevent corrosion of electrodes and decline of insulation resistance.
8. Preheat in soldering so as to be less than 100°C between solder temperature and products temperate to prevent break of these products.
9. When supersonic washing is applied, please confirm cleaning condition in advance because crack may occur in these products and the soldering part by vibration and strength of the terminal electrode may be declined.
10. Confirm in advance washing liquid to use by washing after soldering and so on because an indication seal may get blurred and disappear.
11. When repairing by hand solder iron, temperature of soldering iron should be less than less than 320°C for less than 3 seconds to prevent a terminal electrode decline.

## Tape Packaging (T)

◎ In case of taping packing, plastic tapes shall be used.

### Dimensions

Type	A	B
1041	$4.35 \pm 0.2$	$10.35 \pm 0.2$

[Unit : mm]

### Dimensions

C	D	E	F	G	H	J	K	t
$24.0 \pm 0.3$	$11.5 \pm 0.1$	$1.75 \pm 0.1$	$8.0 \pm 0.1$	$2.0 \pm 0.1$	$4.0 \pm 0.1$	$\phi 1.5$ $^{+0.1}_{-0}$	1.45 max.	0.3 max.

※ A, B, t : Sufficient clearance.

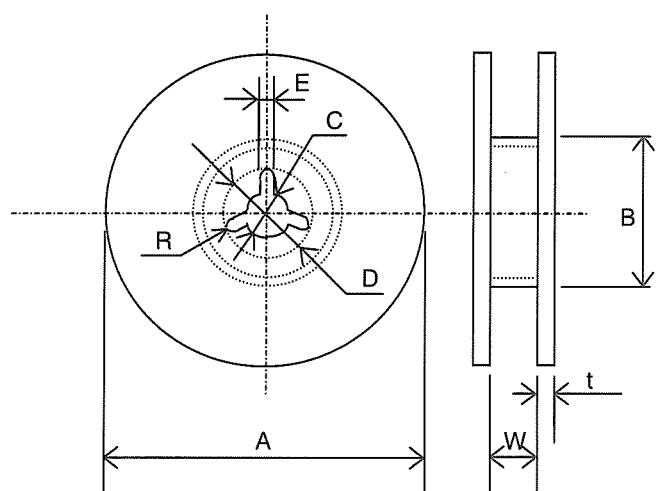

[Unit : mm]

### Dimension of Reel

Code	A	B	C
Size	$\phi 330 \pm 2.0$	$\phi 100 \pm 1$	$\phi 13.0 \pm 0.2$
Code	D	E	W
Size	$\phi 21.0 \pm 0.8$	$2.0 \pm 0.5$	$25.5 \pm 1.0$
Code	t	R	
Size	3.0 max.	1.0	

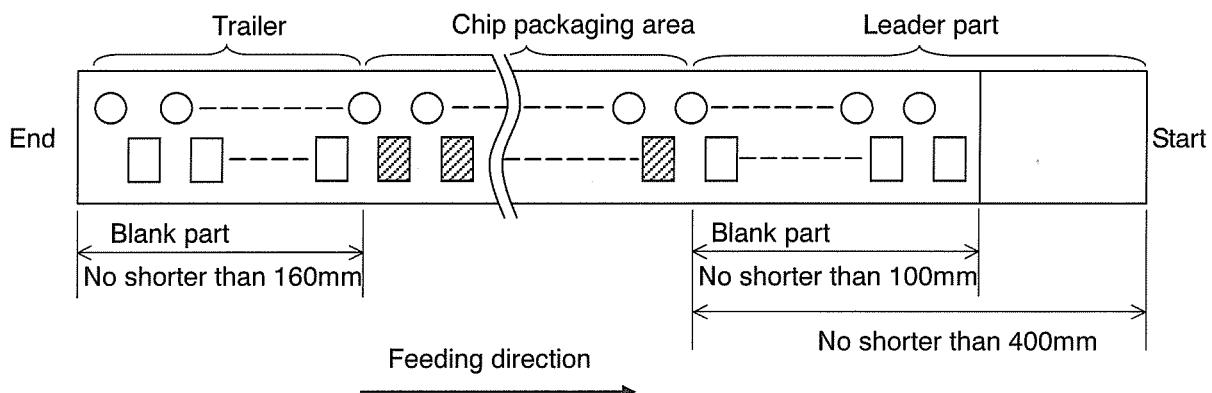

[Unit : mm]

### Dimensions of Reel

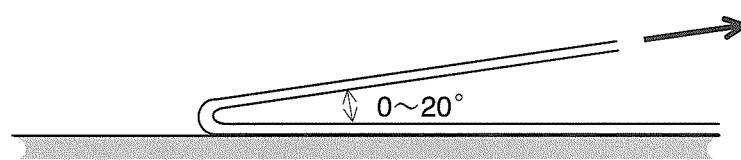

## Tape Packaging (T)

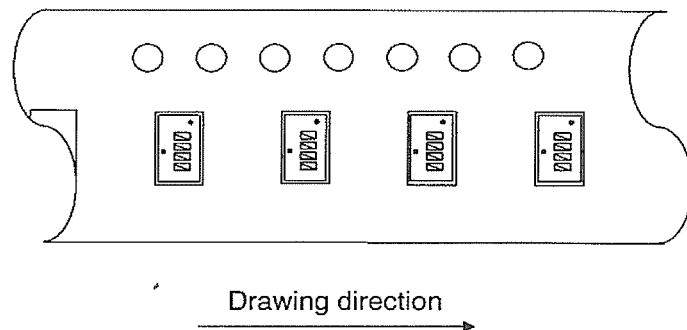

1. Taping shall be right-sided wound. When the end is pulled out, sprocket hole will be at the right-hand side.
2. For packaging chips by taping, blank spaces are provided on taping as shown in the figure.
  - Leader part 400mm min.
  - Leader part (Blank part) 100mm min.
  - Trailer (Blank part) 160mm min.

3. Seal tape of plastic taping shall not be crossed over sprocket holes.
4. Plastic tape shall not be seamed.
5. Tensile strength of tape is 5N (0.51kgf) or over.
6. Number of chips missed from tape reel shall be 1 piece maximum per reel.
7. Standard number of chips contained in a reel shall be 2,000 pieces.
8. Label indicating part No., quantity and lot No. shall be attached to the outside of reel.
9. Peeling strength of seal tape (or top tape) shall be 0.1~0.7N (10.2~71.4gf) when seal tape (or top tape) is peeled from carrier tape at an angle of 0° ~ 20°.

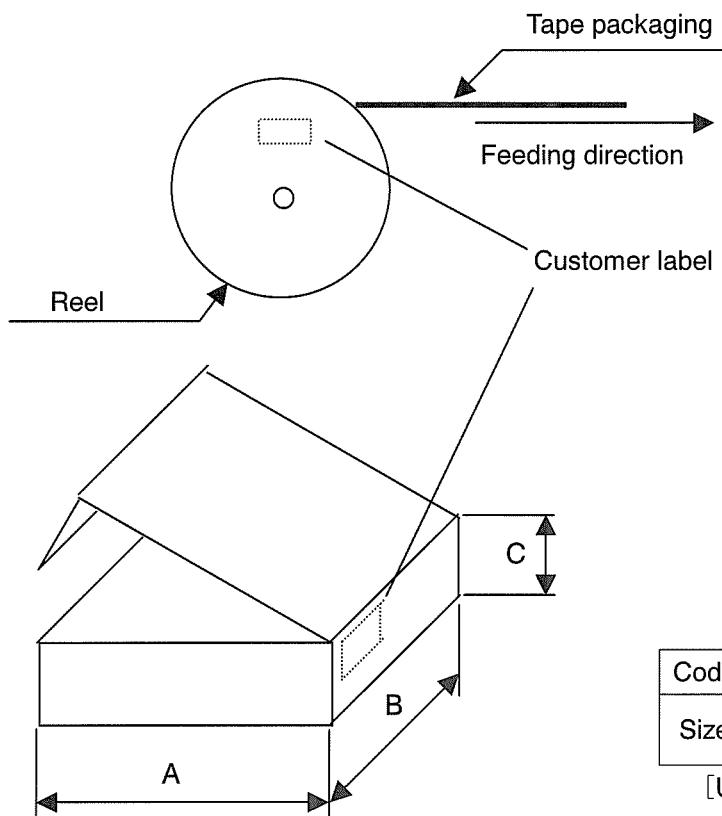

10. Regarding direction of components, direction marking shall be placed on feeding hole side of taping.

## Tape Packaging (T)

### [Packaging Mode]

#### Customer label description

1. Manufacturer Name
2. Customer Parts No.
3. Our Parts No.
4. Quantity
5. Control No.  
(Shipping Lot No.)
6. Manufacturing site  
(MADE IN ○○○)

Code	A	B	C	Reel
Size	350	340	75	2 Reel max

[Unit : mm] (The size is only for reference.)

Material: Paper

Packaging unit: Maximum 2reels in a box.

- To attach labels means that all products are passed.

Operating conditions for guarantee of this product are as shown in the specification.

Please note that Taiyo Yuden Co., Ltd. shall not be responsible for a failure and/or abnormality which are caused by use under the conditions other than the aforesaid operating conditions.

This product is developed, designed and intended for use in general electronics equipments. (for AV, household, office supply, information service, telecommunications, etc.). Before incorporating the components into any equipments in the field such as aerospace, aviation, nuclear control, submarine, transportation, (automotive driving and control, passenger protection,

train control, ship control), transportation signal, disaster prevention, medical, public information network etc. where higher safety and reliability are especially required, please contact Taiyo Yuden Co., Ltd. for more detail in advance.

And before incorporating the components or devices into the equipments not mentioned in the above, if there is possibility of direct damage or injury to human body, please contact Taiyo Yuden Co., Ltd. for more detail in advance.
