

January 6, 2004

Applicant: ASUSTek Computer, Inc.

FCC ID: MSQM3000N

Correspondence Reference Number: 25665

731 Confirmation Number: EA938951

[Response to FCC comments on the above referenced Application.](#)

1) In conjunction with your user instruction on page 68 of 76 "Do not touch or move antenna...". Please instruct the user of the location of the antenna.

[Refer to page 70 in the "User's Manual – Notebook PC \(Revised\)"](#)

2) Details of procedures for Probe calibration. If thermal cal techniques are used please makes efforts to perform wave guide calibration in the future in accordance with Supplement C.

[Refer to "SAR Response EA938951"](#).

3) Details of measurement for dipole verification target value.

[Refer to "SAR Response EA938951"](#).

4) Justification for tissue parameters used. Target values are not compliant with Supplement C. Measurement values are outside target window for both Supplement C and Aprel developed targets. Please include an analysis of the expected variation on the SAR value. Alternatively please provide data using a probe calibrated in liquid with Supplement C target value. Please provide dielectric measurements for at least one preferably two reference liquids.

[Refer to "SAR Response EA938951"](#).

5) Tissue liquid recipe.

[Refer to "SAR Response EA938951"](#).
