### Statement

To whom it may concern,

UGGZ9X0 is a WLAN/BT combination module and it is integrated in model P320 (FCC ID : MSQP320). UGGZ9X0 has a system of the 3 wire co-existence between WLAN and BT. This WLAN/BT co-existence mechanism is to ensure that the WLAN and BT transmitters would not simultaneously operate.

Therefore, WLAN and BT in P320 should not be considered to be able to transmit simultaneously.

Though the users can use WLAN and BT simultaneously, but the real situation is that WLAN and BT are used by time sharing and no overlap transmission.

Should you have any questions or comments regarding this matter, please have my best attention.

Sincerely yours,

Jam Liu
