

American Telecommunications Certification Body Inc.

6731 Whittier Ave, McLean, VA 22101

January 27, 2003

RE: ASUSTeK Computer Inc.

FCC ID: MSQWL230

I have, regrettably, additional comments on this Application.

- 1.) The revised block diagram uploaded to AmericanTCB is nearly identical to the original. Please look at the file you sent. What I am looking for is a block diagram for the 802.11a/b section, and another for the Bluetooth section which will meet the definition of 2.1033(b)(5).
- 2.) The Manual on page 82, second and third paragraph, indicates this device was tested for SAR exposure in a laptop computer. This is obviously incorrect. Regardless, the first paragraph on the same page is correct and is sufficient for this device. Please remove the section entitled "SAR Exposure".
- 3.) Per your email of January 27, 2003, if both the Bluetooth and 802.11a/b transmitters can operate at the same time, then RF Exposure estimation (MPE) will have to be modified.
- 4.) Thank you for your confirmation that the connectors will be glued with "LocTite" or similar adhesive compound. Will this be done at the factory or by the consumer?

I look forward to your prompt response.

William H. Graff  
President and Examining Engineer
