Date: January 21, 2015

FCC: MUH-SKYPORT2
IC ID: 12547A-SKYPORT2

To Whom It May Concern,

The purpose of this letter is to request a new family certification for models T8850, T8900, T7850, T7900, THERM-500 and THERM-500B under the above listed ID numbers. All models use the same exact radio and the same exact associated circuitry. Temperature control features differentiate the models. The same code is used on the humidity models as on the non-humidity models. Just the humidity sensor is populated/ not populated. The residential and commercial models are different only in the code for the time period scheduling temperature changes. No difference in hardware. The only difference between the THERM-500 and THERM-500B is in branding.

	T8850	T8900	T7850	T7900	THERM-500	THERM-500B
Brand	Venstar	Venstar	Venstar	Venstar	First Alert	Bionaire
Same PCB	X	X	X	X	X	X
Same Circuitry	X	X	X	X	X	X
Humidity Module Populated		X		X	X	X
Humidity Module Not Populated	X		X			
Commercial Code	X	X				
Residential Code			X	X	X	X

Sincerely,

Corey McTigue
