

February 4, 2015

To Whom it May Concern:

Venstar produces a thermostat that includes a Wi-Fi radio "on-board".

This Wi-Fi radio's operation complies with the pertinent rules of Part 15 and has no available interface for any user to change these settings. This includes the use of available channels 1-11, noting that channels 12-13 are permanently disabled.

Respectfully,

A handwritten signature in black ink, appearing to read "SD", with a long, sweeping flourish extending to the right.

Steve Dushane

President, Venstar Inc.
