Re: FCC ID: MWC406WIFI

To Whom It May Concern:

The following application is submitted on behalf of our client, Sealevel Systems Inc., for evaluation of their model 406 for Class II Permissive Change certification under FCC Part 15.247.

The purpose of this Class II permissive change is to add a new external antenna / host combination.

The EUT uses a new external antenna / host combination. Therefore, the EUT was evaluated installed in the host. The host will be table top mounted in a single orientation. Therefore, a single orientation representative of the installation position was tested.

The 406 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'.
