

Operational Description

This device is an ADSL2+ Residential Gateway, which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by adapter. The antenna used in this EUT is dipole antenna without connector.

The other instruction, please have a look at the users manual.
